

Appl. No. 09/807,457
Amdt. dated May 19, 2005
Reply to Office Action of January 25, 2005

Amendments to the Specification:

Please replace the paragraph beginning on page 7, line 10, with the following rewritten paragraph:

Because of the advantageous properties of the definitely cured, moulded PU bodies, particularly with respect to their skin compatibility, attainable hardness, mechanical strengths and/or optical properties, the PU material - simple to use, flexible, and where desired elastic - is also advantageous when used for technical purposes in civil engineering and mechanical design. For instance, pipe connections, ways, borders, sheathing, mounting supports, sound and heat insulations, structural elements, components, casts of objects, moulds, optical wave guides, tool components, covers, protective films, and the like can be produced on the spot with it.
